Field Description	Field Abbreviation	Field Length	Field Type	Field Version
UK Provider Reference Number	**XUKPRN01**	**8**	**Char**	**2.2.6**

VALID ENTRIES

UK provider reference number (UKPRN) listed in the HESA Data Management table static_data.Ukprn_Lookup_v1 (see Technical specification) for institutions listed in the HESA Operations operations/inst-lists-and-sign-off specification for the particular collection.

DESCRIPTION
This derived field will add the institution's UKPRN to datasets, to allow linking between streams and years.

Until INSTID is replaced by UKPRN in all datasets, this derived field will be added to all datasets where UKPRN is not a valid field.
(Collections where INSTID has not been replaced by UKPRN are Cyy025, Cyy041, Cyy018, and XUKPRN01 is added to datasets.
XUKPRN01 is not added to Cyy051, Cyy052, Cyy031 or Cyy042 where UKPRN is a valid field.)

The field will be populated for all INSTIDs as listed in the Data Management institution specification for the particular collection.

This mapping to UKPRN is carried out through the use of the static data UKPRN lookup table (see technical specification, below). The first version of this table was created for 2006/07 and contains mappings for institutions from 2006/07 onwards. The values are taken from UK Register of Learning Providers (UKRLP) http://www.ukrlp.co.uk/ukrlp/ukrlp.first.

DEFINITION (including fields on which this derived field is dependent)
Each institution in the collection will have a HESA INSTID. Where required in the derived field specification, this is mapped using the static data UKPRN lookup table to a UKPRN and returned in XUKPRN01.

DEPENDENT FIELDS

none

TECHNICAL SPECIFICATION

Where required in the collection's derived field specification, each institution will have this field added using a value from the HESA Data Management STATIC_DATA.UKPRN_LOOKUP_V1 table in Oracle.

The table static_data.Ukprn_Lookup_v1 consists of 2 columns:

Column	Description
f_instid	Institution identifier (VARCHAR2(4))
Institution identifier (VARCHAR2(4))	UK Provider Reference Number (VARCHAR2(8))

INSTID (CHAR 4)	XUKPRN01
Found in STATIC_DATA.UKPRN_LOOKUP_V1.F_INSTID	STATIC_DATA.UKPRN_LOOKUP_V1.F_UKPRN
