2. Overview

Specification for UCAS data for HESA transaction (formerly *J UCAS transaction) for 2015/16

a. Basis of specification

This transaction is designed to provide data available from UCAS in a format suitable for use in providers' HESA Student record. This specification describes the fields that will be included in the transaction, and the translations from UCAS to HESA coding conventions.

The HESA data requirement is published as part of the coding manual and is available at:

https://www.hesa.ac.uk/index.php?option=com_studrec&Itemid=232&menl=15051

b. Providers' access to transaction

Providers will be able to obtain this transaction from UCAS through

- (a) A flat-file structure
- (b) ODBC link directly into tables
- (c) XML link

c. Timing

This transaction will be available from UCAS at the end of an application cycle, once examination results are confirmed. Release for 2015 is planned for November 2015.

d. Structure

The structure of the transaction is one record per admitted student. This UCAS transaction cannot be split into an entity structure. So, for example, course-related information is provided assigned to each student according to course applied for and qualifications are provided as a repeating group of fields, as a starting point for providers.

e. Coverage

*J will be provided to providers for all students admitted in an application cycle for a given year for the following students:

1. all placed applicant undergraduate students in main UCAS system and all integrated masters degree students in main UCAS system
2. all placed applicant undergraduate students in UCAS Conservatoires (UC)
3. all placed applicant students in UTT

Note that deferred students will be included in the *J transaction of their year of application, and every subsequent year for which the student is a live applicant (e.g. for a student applying in 2007 for deferred entry in 2009, the student will appear in the provider transaction for 2007, 2008 and 2009).

Note also that UTT has a restricted range of data (see specification for details).

Certain field coverage is restricted by HESA validation to undergraduate or postgraduate courses. UCAS will use the course assignment provided to them by providers for this classification and consequent supply of data.

HESA has some validation that only requires data for students with particular domiciles or for providers in particular countries. UCAS will however pass on to providers data for all students that have provided it.

f. Changes to specification

HESA will notify UCAS of any changes to the specification of this transaction by the December preceding the reporting year it is relevant to (e.g. December 2010 for 2011/12 HESA reporting year).

UCAS will notify HESA of any changes to their processes and codes affecting this transaction by the December preceding the reporting year it is relevant to (e.g. December 2011 for 2012/13 HESA reporting year).

*** The Kingdom of the Netherlands comprises the European country of The Netherlands (NL); the Caribbean country of Aruba (AW), and the former island territories of the Netherlands Antilles: Curaçao (CW); Sint Maarten (Dutch part) (SX); and the combined special municipalities of Bonaire, Sint Eustatius and Saba (BQ).

On October 10th 2010, the Netherlands Antilles (AN) was dissolved and its constituent island territories became constituent countries or special municipalities of the Kingdom of the Netherlands in their own right. Consequently, the Netherlands Antilles (AN) has ceased to be a valid code for entrants from 2011/12 onwards in DOMICILE, and has been superseded by the following codes:

CW Curaçao

SX Sint Maarten (Dutch part)

BQ Bonaire, Sint Eustatius and Saba

Appendix F – EntryProfile.QUALENT3

The QUALENT3 value in the *J uses three indicators to help find the Highest Qualification on Entry. Each of these indicators is derived in a different way before being brought together for the QUALENT3 calculation. The three values are:

HIQE
HIQA
Best ABL

For the below values and for the calculations used in the *J the “highest” or “best” qualification is defined by taking the QUALENT3 coding frame as a hierarchy. Therefore, the closer to the top of the coding frame a qualification sits the higher or better it is. For example; P50 will be taken over P62 as it is nearer to the top of the coding frame. It should be noted that the hierarchy structure does not extend to the qualifications within the categories (e.g. no distinction is made between A Levels and AS Levels as they are both P50 qualifications).

HIQE

This is the Highest Qualification Expected. This value is calculated from qualifications entered by the applicant in Apply; specifically qualifications where they have entered a grade of “Pending”.

If the applicant has not entered any expected qualifications the value will be X06 (Not Known).

HIQA

This is the Highest Qualification Achieved. This value is calculated from qualifications entered by the applicant in Apply; specifically qualifications where they have entered a grade.

If the applicant has not entered any achieved qualifications the value will be X06 (Not Known).

HIQA and HIQE do not use codes P92, P93 or P94.

Best ABL

This is the Highest Qualification received through the Awarding Body Linkage process. These are verified results that UCAS obtains directly from the Awarding Bodies.

If an applicant does not have any ABL qualifications the value will be X06.

Calculation Process

This first part of the calculation will set either a FINAL or PROVISIONAL QUALENT3 value. If a PROVISIONAL value is set it will then determine whether a value of P92, P93 or P94 needs to be returned. P92, P93 and P94 are special Level 3 codes that indicate the following:

P92 - Level 3 qualifications of which none are subject to UCAS Tariff

P93 - Level 3 qualifications of which all are subject to UCAS Tariff

P94 - Level 3 qualifications of which some are subject to UCAS Tariff

Level 3 qualifications are those with a “P” code.

The initial calculation is as follows. It performs each rule in turn until the FINAL QUALENT3 is established:

IF HIQE is better than HIQA and Best ABL and also above Level 3
Set HIQE as FINAL QUALENT3

IF Best ABL is equal to or better than HIQA
Set Best ABL as PROVISIONAL QUALENT3

ELSE
Set HIQA as PROVISIONAL QUALENT3

IF PROVISIONAL QUALENT3 is not at LEVEL3
Set PROVISIONAL QUALENT3 as FINAL QUALENT3

ELSE
Check for P92, P93, P94

NOTE: Due to the fact that it is possible for QUALENT3 to be set by qualifications entered in Apply only, HEIs should make sure that their students have the right qualifications. This may apply to any QUALENT3 (but in particular those above Level 3).

P92 / P93 / P94 Check

As part of the P92, P93 and P94 check the *J will look at all Level 3 qualifications both entered in Apply and received via ABL.

IF number of unique Apply and ABL Level 3 QUALENT values combined are = 1
Set PROVISIONAL QUALENT3 as FINAL QUALENT3

ELSE

IF all Apply and ABL qualifications that are at Level 3 are on the UCAS Tariff
Set P93 as FINAL QUALENT3

ELSE

IF all Apply and ABL qualifications that are at Level 3 are not on the UCAS Tariff
Set P92 as FINAL QUALENT3

ELSE
Set P94 as FINAL QUALENT3

NOTE: From 2014 HESA have requested the following:

No UK qualifications should be given a code of P80. Therefore if a Provisional QUALENT3 of P80 is set in step one, before a Final QUALENT3 is set *J will look at whether the highest qualification is in the Tariff. If it is P93 is set as Final, if not P92 is set as Final.
